

Technical Reporting

Tenure: EL 27741

Group Report ID: N/A

Title: Final Report

Report Period: 09/07/2015 to 18/08/2016

Project Name: Western EL's

Title Holder: Seth Pty Ltd

Title Operator: Seth Pty Ltd

Personal Author: Ernie Chin

Report Type: Final

Date of compilation: 28/09/2017

250K Mapsheet/s: Auvergne

100K Mapsheet/s: Keep

Geological Province: Bonaparte Basin, Halls Crk. Origin

Stratigraphic Name: N/A

Target Commodity: Gold and Copper

Other Commodities: Nil

Purpose for which Titles are held: Exploration

Title history: EL 27741 granted 09/07/2015 and cancelled 18/08/2016

Location, physiography and access: EL 27741 is located on the western side of the NT, adjoining the WA/NT border. Access from Darwin, via the Stuart and Victoria highways. From the Victoria Highway the Keep River road and/or various bush/station tracks provided access to EL 27741. Access to the EL area via the best maintained roads was denied by local Aboriginals and station owners/management. Alternative routes via old bush tracks proved to be torturous and time consuming due their poor condition.

Geology Setting: EL 27741 was located across the Bonaparte Basin and the Halls Crk Origin.

Exploration/Mining History: N/A

Exploration Rationale: The intent was to conduct a preliminary ground survey and take chip samples from prospective areas after recording their locations via GPS. In addition, it was thought possible that native cooper nuggets may exist which could be located with a metal detector.

Work Completed: No on the ground due to difficulty of gaining access to the site.

Results: None to report

Conclusions/Recommendations: The area may have potential but the access issues make the areas un-attractive for the small private operator.
