Reporting period first and final report as lease area EL32698 has been relinquished.

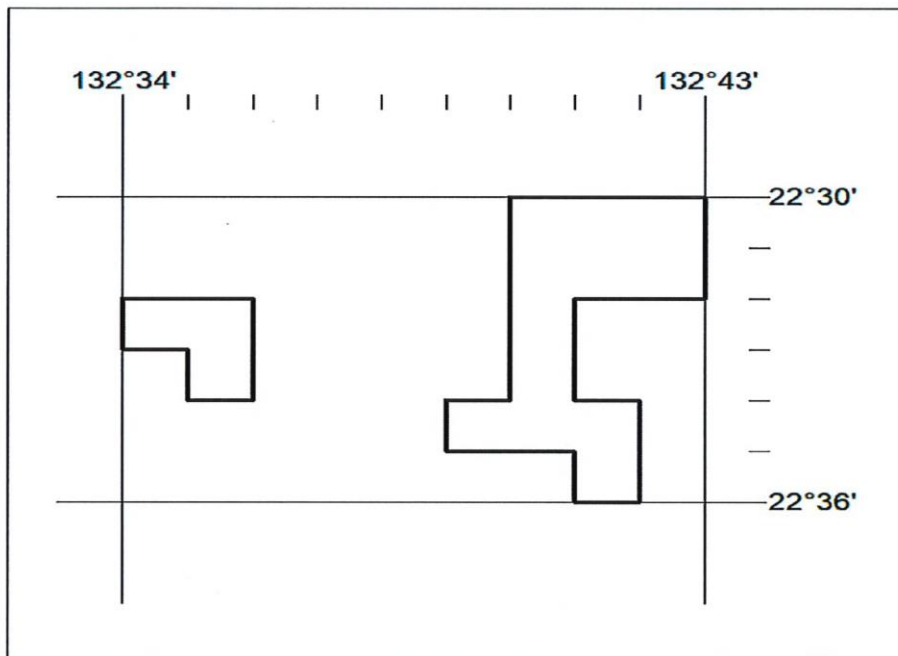

The Area was looked over by Johannes Bruynzeel from Helicopter prior to Lease application and the areas as shown on the Napperby map sheet as Pat on the Northern side of the lease have visible Iron mineralization visible from air but very intermittent and difficult area to traverse by foot.

Mioxide NT decided not take on further exploration requirements in this difficult terrain as we have become largely focused to move to production of Iron Oxides from our current granted lease areas and need to stay focussed on our current Lease areas.

Traversing area by Helicopter prior to lease application
