KEWANEE AUSTRALIA PTY. LIMITED

FINAL REPORT

E.L. 800 REYNOLDS RIVER.

PROJECT 23

For maps refer CR72/47
CR19730229
E.L. 800, REYNOLDS RIVER

E.L. No. : 800
Original
Expiry Date: 2/12/73
Work Commitment : $10,000

Name : Reynolds River
Prospect No. : 23
Area : 14 square miles

GENERAL INFORMATION

E.L. 800, Reynolds River was held by this Company under Authority to Prospect 3310 prior to its conversion to its present status on 3/12/72. The Company requested relinquishment of this licence effective 20th September, 1973.

The Daly River road runs through the 14 square miles triangular shaped E.L. 30 miles from the Stuart Highway, 92 miles from Darwin. Water is readily available the year around from a number of billabongs in the general vicinity, in particular from the Noltenius Billabong.

Nearest population centre is the Daly River situated approximately 25 miles from the centre of the E.L. A light aircraft strip is located at the Daly River Mission.

Climate of the area is tropical.

MAPS AND PLANS

No maps or plans other than the airborne data were prepared during this period.

GEOCHEMISTRY

No geochemistry was done over the area.

GEOPHYSICS

An airborne magnetometer/scintillometer survey was conducted under contract by Aero Service (Australia) Pty. Ltd. during late November, 1972.

WORK DONE

This Exploration License was evaluated in view of its limited size during the previous year in conjunction with other adjacent E.L.'s held by the Company in the area. Detailed evaluation work was carried out on these exploration licenses, in particular E.L. 373 and 118, in the form of diamond drilling (3 holes), detailed grid airtrac drilling for geochem and geological information, ground magnetometer and scintillometer work, and detailed geological mapping over a number of the more interesting areas. This information has been submitted in full to the Department.

The area was reapplied for in November, 1972 in view of the Company's airborne magnetometer and spectrometer survey program over exploration licenses held in the north and the centre of the N.T. This survey was flown under contract by Aero Service (Australia) Pty. Ltd. during late November and early December, 1972. This prospecting license was partially covered by this survey and relative information was forwarded to the Department with the first quarterly report.

The area was again briefly geologically examined for a final assessment in conjunction with a geological reconnaissance mapping and scintillometer survey over northern part of E.L. 296 and
EXPENDITURE

Total expenditure incurred during the abbreviated license period is $1200.00 which includes a portion of airborne survey costs, salaries, and related office overheads.
