LIST OF MAPS

Location Map – Southern Cross Bore Concession
and 16 Mile Bore Concession 1
1. Introduction

No work was done in the Concessions during the Quarter. The Exploration Licences were held pending results of fine (-1/2 mm) concentrates from our Johannesburg Laboratory.

2. Results

The results for all the samples taken in the Concessions have now been received. Sample J0030 contained a diamond weighing 0.0002 carats. No further kimberlitic indicator minerals have been found in any of the other samples.

3. Expenditure

The expenditure incurred up to February 23, 1974, is summarised below:

<table>
<thead>
<tr>
<th>Item</th>
<th>Amount</th>
</tr>
</thead>
<tbody>
<tr>
<td>Consumable stores</td>
<td>$8.00</td>
</tr>
<tr>
<td>Total for Quarter</td>
<td>$8.00</td>
</tr>
<tr>
<td>Total to date</td>
<td>$14,033.00</td>
</tr>
</tbody>
</table>

4. Staff

No staff was employed in the Concessions during the Quarter.

5. Forward Programme

The microscopic diamond mentioned above is not considered sufficient to warrant further work in the Concessions, and the geochemical results do not disclose mineralisations worth investigating.

We therefore, intend to relinquish the licences in the near future.

6. Plans

The Concession Map issued with this report shows the location of sample J0030 with its diamond result. The map remains otherwise unchanged from the previous maps submitted.
