ANNUAL REPORT

TO

NORTHERN TERRITORY DEPARTMENT OF MINES & ENERGY

FOR MLN 1037

APRIL 1988 - MARCH 1989

Introduction

Mining

Expenditure
INTRODUCTION

MLN 1037 was granted as a lease for ancillary mining purposes. It abuts MLN 1049 along its northern boundary and allows for the provision of additional areas of fresh water storage and waste rock storage and the mining and use of extractive minerals as may be required in the mining operations on the adjoining mineral lease.

MINING

The only activity carried out to date has been a topographic survey as a basis for design studies for future tailings storage and water disposal areas.

EXPENDITURE

No expenditure has been recorded against the lease.
