LIST OF PLANS

Figure 1  MC Location Plan
1. **INTRODUCTION**

MCC 1025 was granted on the second of January, 1991 for a period of 5 years to Western Mining Corporation Limited (WMC) and Giants Reef Mining Pty. Ltd. (GRM). WMC and GRM operate under a Joint Venture where WMC has 80% (and is the Manager and Operator) and GRM has 20%.

The area was originally applied for in May, 1990 to cover an area of interest in E.L. 5497 (Figure 1).

This is the first annual report on the licence.

2. **WORK COMPLETED AND EXPENDITURE**

As a period of over 7 months elapsed from the line of application to the time of Grant, all intended work on the target was completed under the Exploration Licence title. This work has been duly reported in reports to the NTDME.

Due to heavy commitments of both expenditure and personnel on other parts of the Joint Venture, no field work has been undertaken on MCC 1025 during the period under report. Consequently, no direct expenditure has been recorded against the MCC.
