1. INTRODUCTION

The report is an addendum to the relinquishment report for the Tanami Project group of tenements, dated December 1996. The relinquishment report (SMA9605) describes work carried out by North Flinders Mines Ltd (NFM) over portions of the Tanami Project group of tenements that were relinquished on 12 September 1996. A total of 1918 blocks were relinquished from 12 of the 13 tenements as shown on Figure 1 and detailed in Table 1.

Table 1 - Tanami Project Exploration Licence Statistics

Number	TENEMENT Name	DATE OF GRANT	NUMBER OF BLOCKS		
			Original	Relinquished	Current

EL7122	MacFARLANES	26/09/90	220	26	194
TOTAL			2400	482	1918

Unfortunately, a section pertaining to EL4529 (The Window) was omitted from the original report. This section is provided in this addendum.

In addition, supplementary figures are included with this addendum. These figures complement A3 sized sample and drillhole location figures bound into the relinquishment report. These supplementary figures which are AO sized plans plotting data at a scale of 1:50 000, are referenced to the original figure.

The amended figure list prefaces this report.

2. EL4529 - The Window

EL4529 is centrally located within the Tanami Project group of tenements. This exploration licence completely encloses MLS 8, The Granites Gold Mine mining lease (Figure 1).

A single block was relinquished from the southern portion of EL4529, reducing the area from 50 to 49 blocks.

No exploration activity has been undertaken on this relinquished area, other than regional assessment of published maps and airborne magnetic data.
