

Annual Report. (as advised)

I have been to my claim at Jervois probably 2 or 3 times during 1997.

Due to the heat in the Summer time + the distant of approx 800 Kms return, only allows me to go a few times a year.

I have mainly extracted from my lease approx 30 kgs of Smoky Quartz + Citrine Crystals. ^{This is} for my own personal Collection of gemstones. Sometimes I have swapped with other besickers from interstate for different types of gens.

I have had no trouble at the claim, besides scorpions + snakes, + wrecking ~~me~~ 3 tyres on my Car. The people at Jervois are always friendly + helpful. During 97 I have heard ^{of} some locals who have found my claim, ^{and are} drawing maps for people to dig out there. (I don't know how to stop this.)

During 98 I hope to spend some more time on my claim, to see what is really out there.

Thank you
Kenneth Lyall
