

RELINQUISHMENT REPORT FOR E.L. 9191

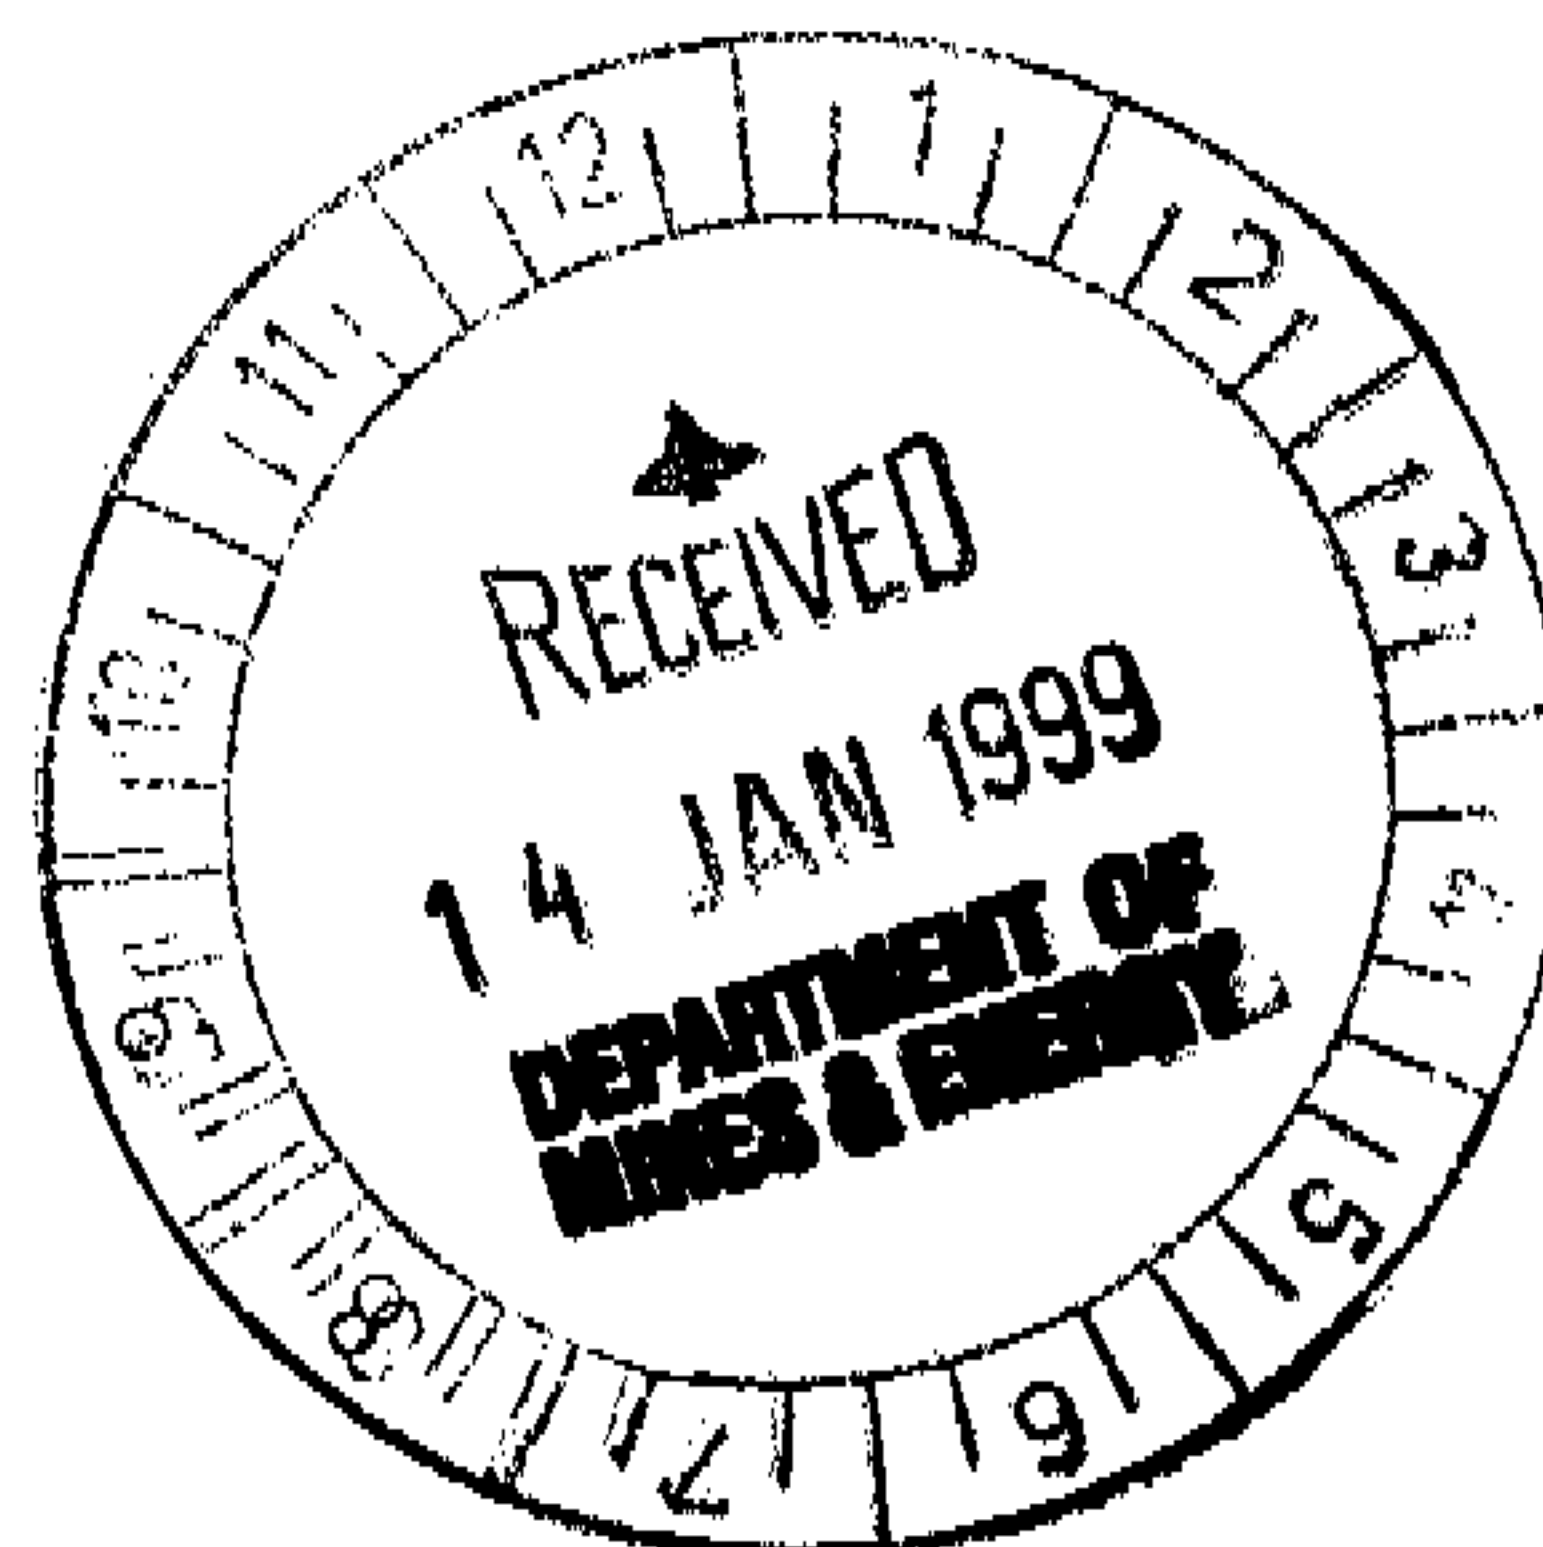

January 1999

NORTHERN TERRITORY OF AUSTRALIA

LICENCE HELD BY JOHN WILLIAM BENDER

OPEN FILE

CR99/026

E.L 9191, covering 21 graticular blocks was granted to John William Bengner on 15th August 1996 for a period of six years. The area lies within both Laughlen and Riddoch 1:100,000 map sheets.

Exploration work was to be carried out to determine the presence of Industrial Garnet (and subsequently Magnetite) within the water course of Oneva-Ongeva Creek and tributaries.

The Garnet in this water course is shed from the Riddoch Amphibolite at the western end of the Harts Range.

Initial work within E.L. 9191 was carried out under a Joint Venture agreement with Kajar Pty Ltd of Goovigen in Queensland.

In 1997-98 Olympia Resources NL of Perth joined the Joint Venture and in 1997-98 considerable work was carried out by Olympia.

However, during the term of tenure of E.L 9191 no work, was carried out over the 3 graticular blocks which have been relinquished due to a lack of any resource potential.
