RELINQUISHMENT REPORT FOR E.L. 9558

January 1999

NORTHERN TERRITORY OF AUSTRALIA

licence held by john william benger
E.L. 9558, covering 105 graticular blocks, was granted to John William Benger on 4th December 1996 for a period of six years. The area lies within Illogwa Creek 1:250,000 map sheet.

Exploration work was to be carried out to determine the presence of Industrial Garnet resources within water courses of the E.L area.

The Garnet in this area was shed from Irindina Gniess at the south-eastern end of the Harts Range.

Within the relinquished area, 53 graticular blocks, a full and careful reconnaissance was carried out, but no suitable Garnet resources were found and therefore no samples were taken.

Work was carried out under a Joint Venture agreement with Kajar Pty Ltd of Goovigen in Queensland.
