Annual Report for MCT 4006 - 4007
for the period 15-7-91 to 14-7-92

Tenement Holder: Richard Henry Neilson

Work carried out during 1991 - 1992

During the period being reported on I have prospected the whole length of Hayes Creek which lies within the tenements on two occasions. This prospecting has shown the presence of tin and gold within the creek system. Grades of up to 0.5 gms/tonne for tin and 0.02 gms/tonne for gold have been found and old mine workings contained within the tenements have been detected for gold no significant gold occurrences were found.

A semi permanent structure for dwelling purposes has been erected on MCT 4006 and a waterline has been installed from this dwelling to an existing dam on Hayes Creek which lies on MCT 4007.

Expenditure
