

Final Report. EL 6235

Introduction.

Work Conducted.

Expenditure.

Maps, Location and Exploration.

Intro.

The South boundary of EL 6235 is located approx 34 Kilometres East of Pine Creek and is accessible via the Wandie mine Road. EL 6235 is serviced only by wheel tracks.

Our Research shows that very little or no workings occur in this area.

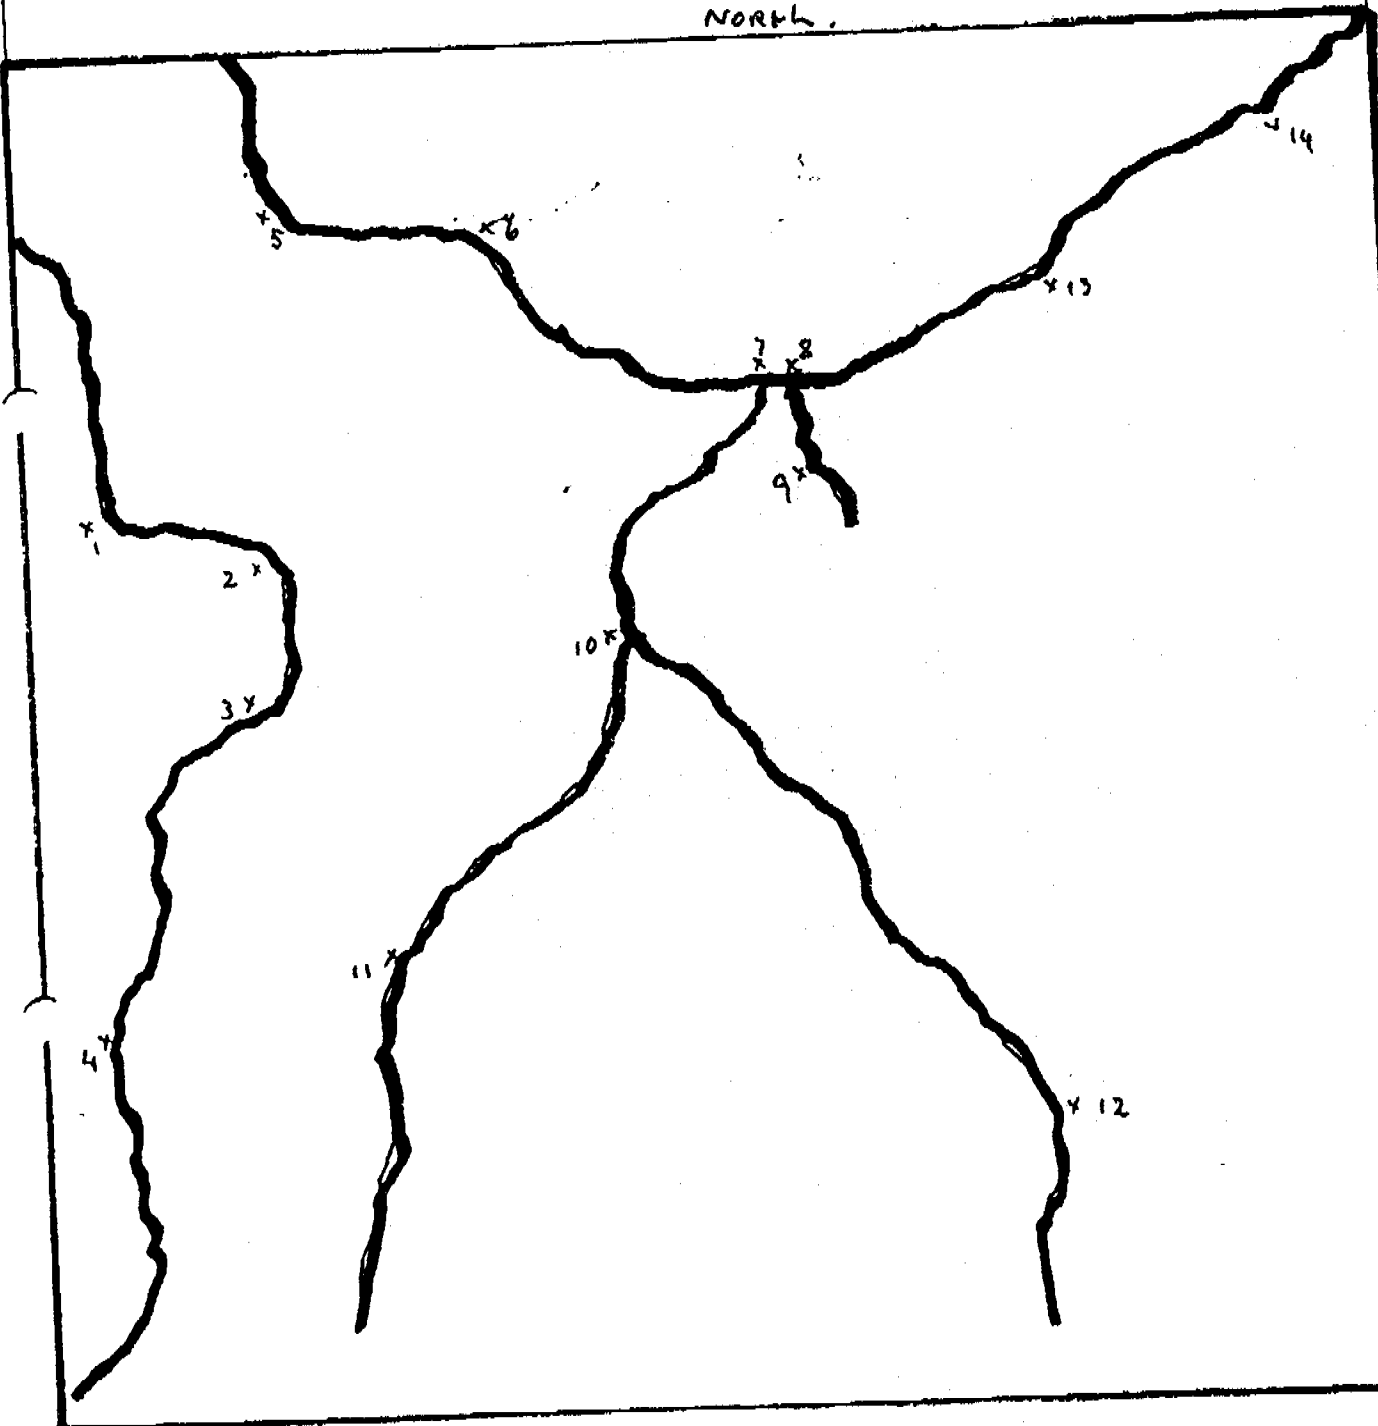

Work Conducted.

Our work in this area, as the first schedule map shows, was quite extensive. All points marked were sampled by panning and although our expectations were high our results were negative. It was these negative findings that have led us to believe that no extra work or added expense was warranted.
