

METANA MINERALS N.L.

TENNANT CREEK AREA

PROJECT PROGRESS REPORT ON

MINERAL CLAIMS 427-440

SKIPPER PROSPECT

FOR THE YEAR ENDING 29th APRIL 1989

OPEN FILE

A. W. MACKIE

SUMMARY

MCCs 427-440 comprising the SKIPPER Prospect were partially mapped and completely soil sampled (80 x 40m line spacing) before ASSPA declared a sacred site over most of the prospect (264 Ha). Consequently the area has been in abeyance since May 1988.

A number of soil anomalies were delineated which require following-up, ASSPA permitting. A map showing the extent of the MARLA MARLA - KANTAJI sacred site complex and how it affects the SKIPPER Prospect is included (Fig 5).

CONTENTS

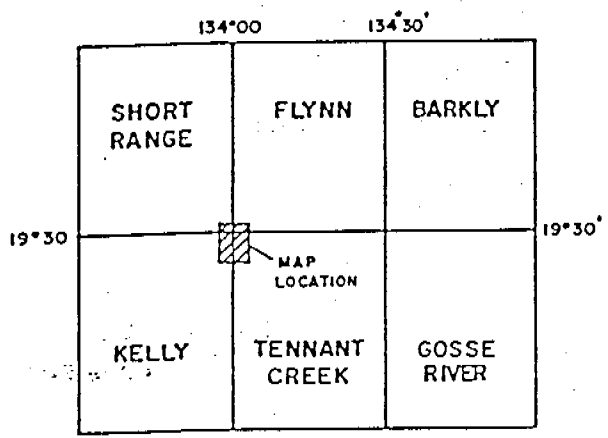

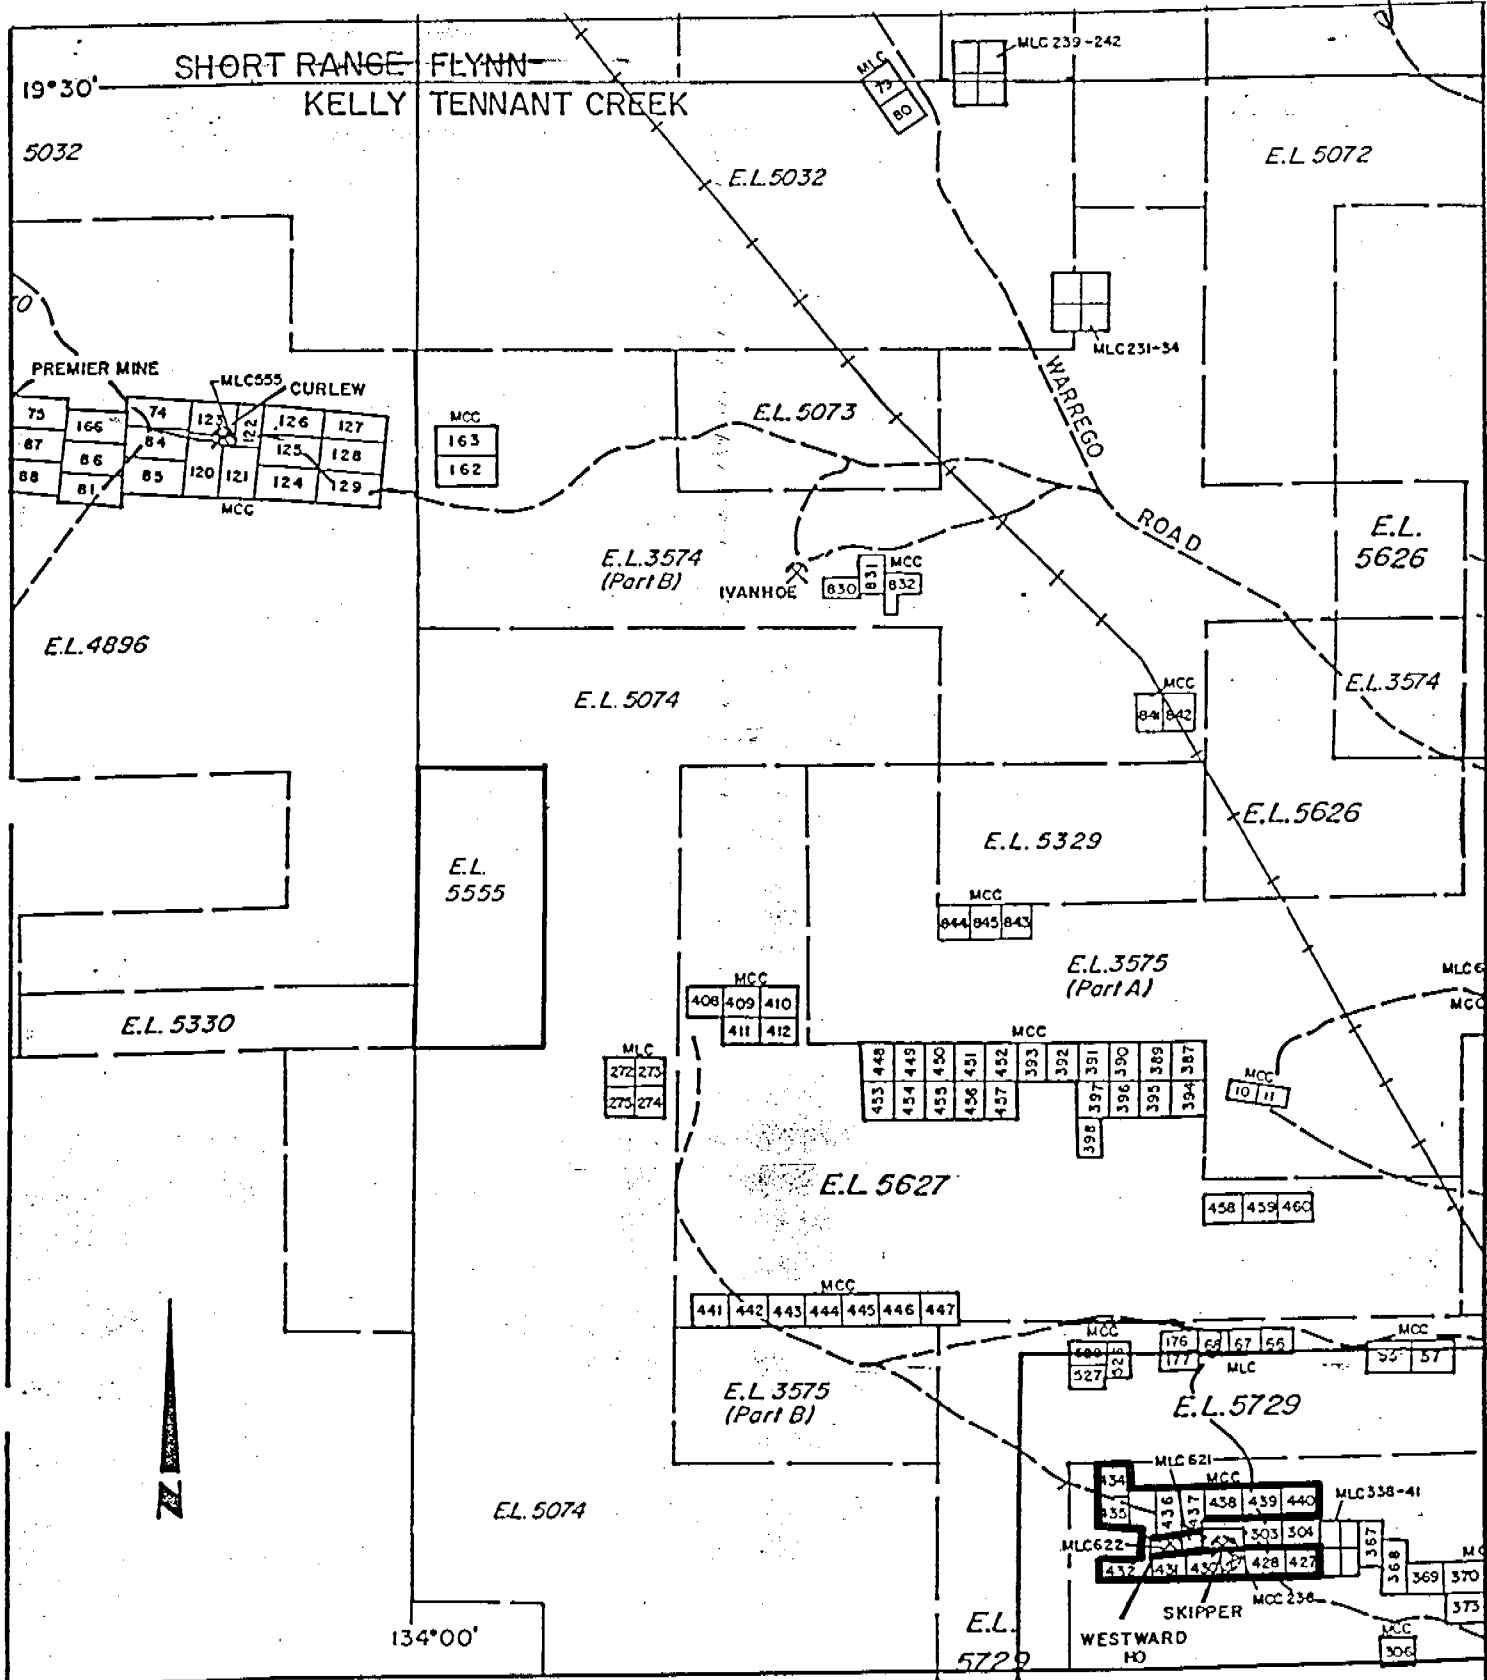

SUMMARY

- 1.1 Locality and Access
- 1.2 Tenure
- 1.3 Regional Geology
- 1.4 Airborne Magnetism
- 2. Exploration Programme - 1988
 - 2.1 Geological Mapping
 - 2.2 Soil Sampling
 - 2.3 Results & Conclusions
- 3. Expenditure

- 2. Skipper Prospect Regional Geological setting
 (after Williams, 1987)
- 3. Magnetic anomaly map (after Fox, 1987)
- 4. Skipper Prospect soil results 1:2500
- 5. Marla Marla - Kantaji sacred site location
 plan, 1:100 000.

Appendix 1 - Soil Results

NATIONAL 1:100000 SHEET INDEX

TENNANT CREEK PROJECT		
SKIPPER MCC 427-440		
LOCATION PLAN		
Scale: 1:100000	Date: NOV. 1988	Plan N°:
MFTANA MINERALS N.L.		

1.1 Locality and Access (refer to Fig 1 - location plan).

1.2 TENURE

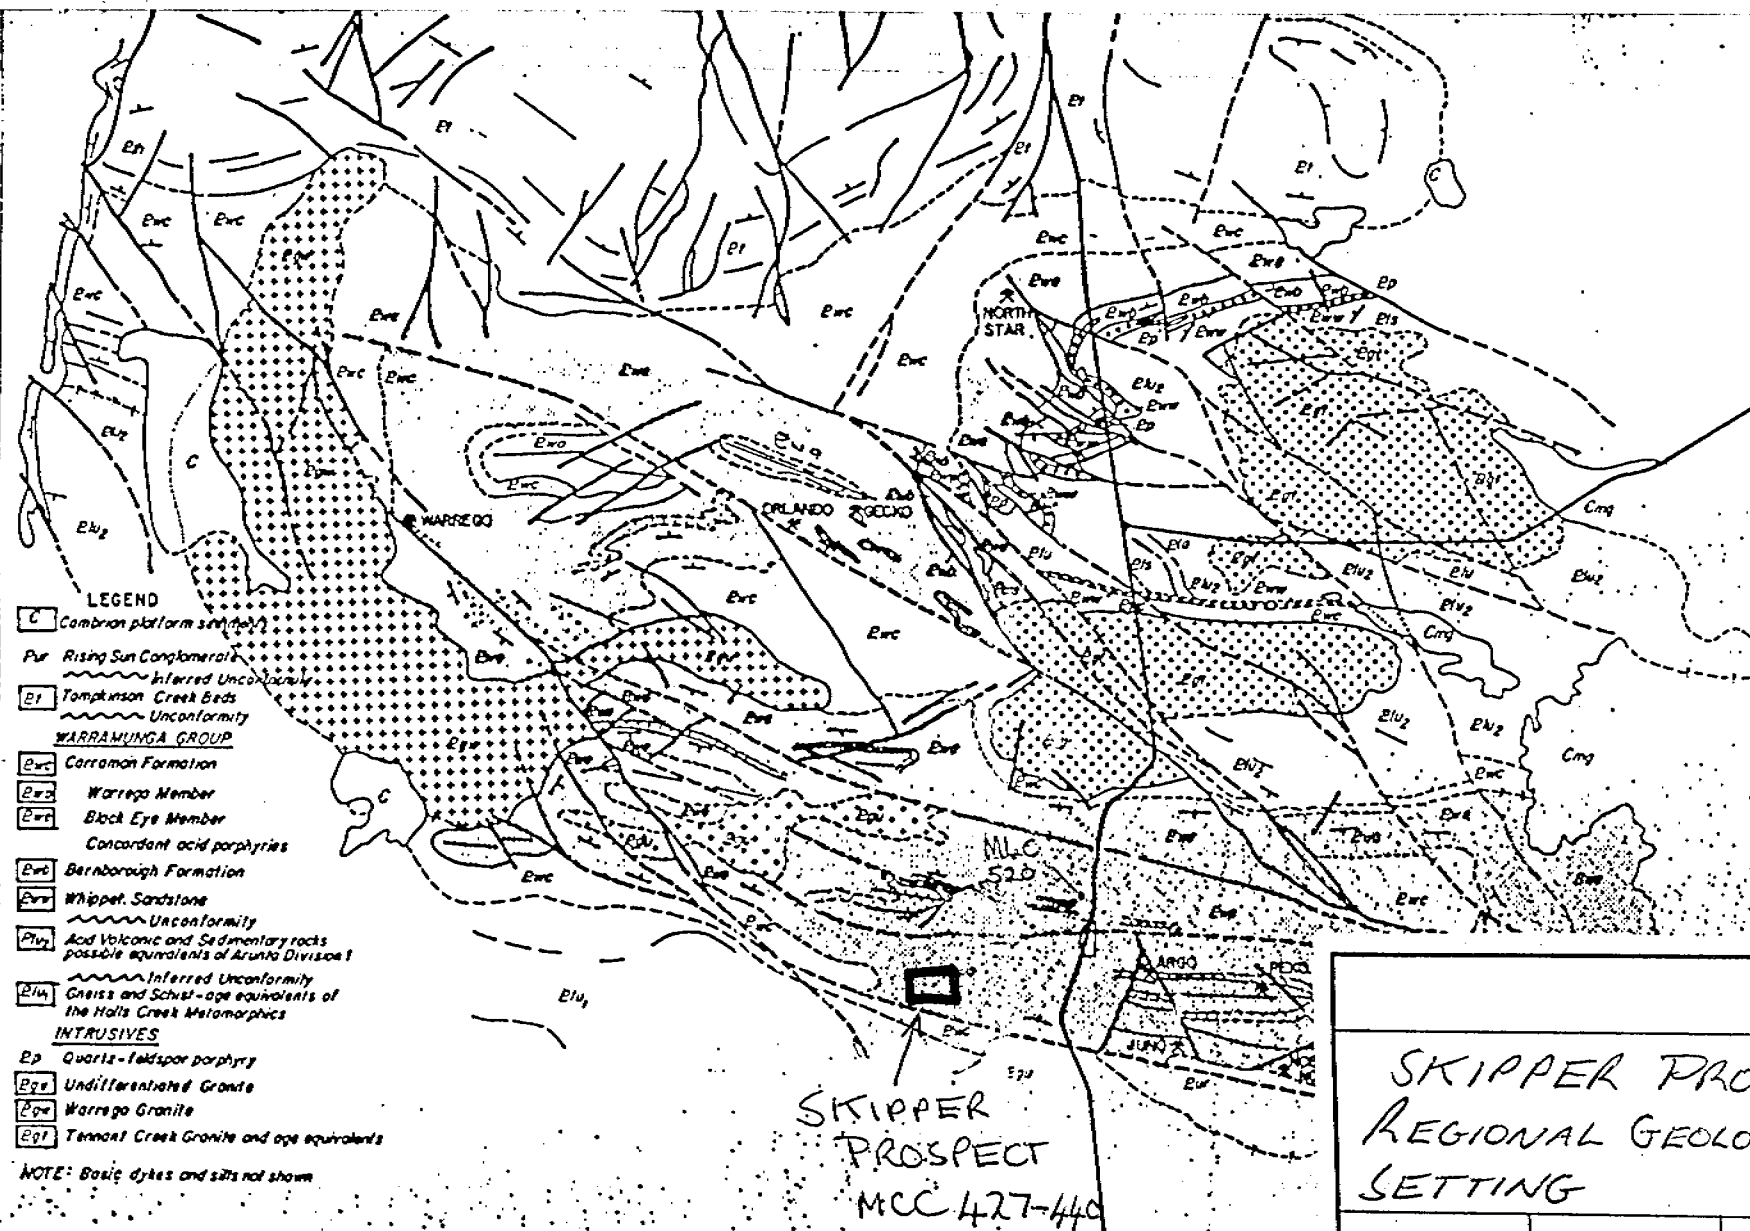

MCCs 427-440 are held by TENNANT CREEK GOLD LTD. They are part of a joint venture agreement with and operated by METANA MINERALS N.L.

1.3 Regional Geology (Fig 2, Williams 1987)

The SKIPPER Prospect is underlain by greywacke, sandstone and siltstone of the Carraman Formation, Warrumungu Group. Locally, it forms the Western extremity of the NOBLES NOB - JUND - ELDORADO - MT SAMUEL 'line' which has produced in excess of 2.7 million ounces of gold.

1.4 Airborne Magnetism (Fig 3, Fox 1987)

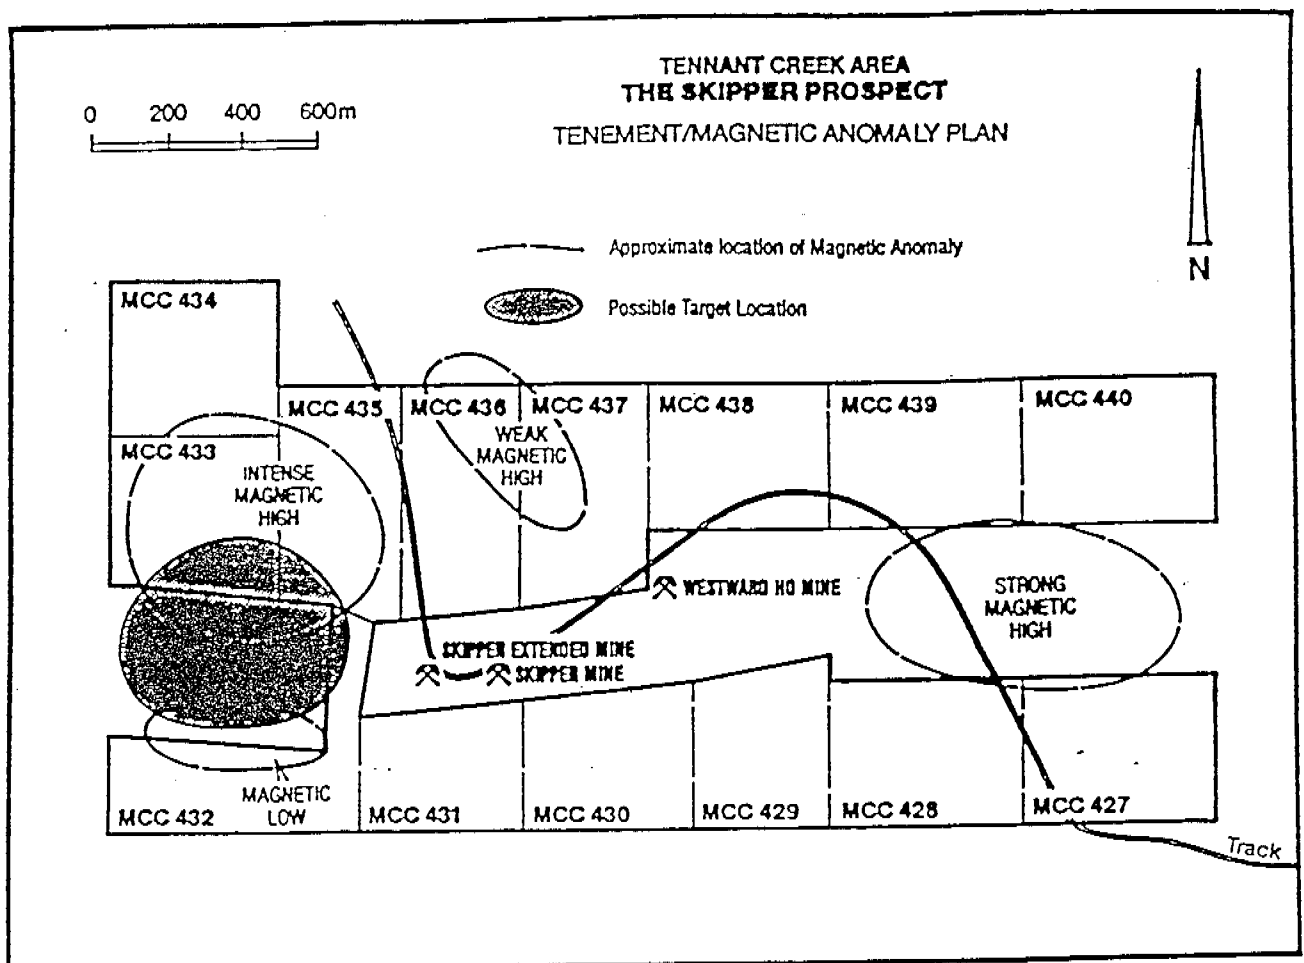

There is an intense magnetic anomaly centred on MCC 48 (PEKO) part of which extends northwards into MCC 433. No follow-up ground magnetism have been undertaken to date.

SKIPPER PROSPECT REGIONAL GEOLOGICAL SETTING

Scale: Date: Dwg No:

METANA MINERALS N.L.

Prepared for K. Fox and Associates by Merrison Associates for inclusion in this Prospectus.

2. Exploration Programme - 1988

2.1 Geological Mapping

The Southern claims have been mapped at 1:2000 scale. Compilation and draughting has yet to be undertaken as the mapping program was terminated by the declaration of the MARLA MARLA - KANTAJI sacred site.

2.2 Soil Sampling (refer fig 4)

The area under mineral claim was gridded and soil sampled on a 40 x 20m spacing. 2194 samples were collected and analysed. This work was completed before the declaration of the sacred site.

2.3 RESULTS & CONCLUSIONS (REFER Fig 4)

A prominent enhancement, to a 59 Ppb maximum, occurs centred on 5580 E , 3980 N . This zone is 160m EW and 40 - 50m NS.

A prominent enhancement also occurs centred on 6500 E, 4440 E . It appears to reflect a drainage channel emanating from a prominent topographically high iron stone. There are a number of spot values the highest of which is centred on 6660 E , 4540 N - 490 Ppb. All these anomalous zones will be followed-up when (if ever) the sacred sites authority allows us back on our tenements.
