

APPENDIX

2-1-1

APPENDIX 2 - 1 - 1

Drill Hole Collar Summary Report

The drill holes for which assay data are presented in Appendix 2-1-2 are listed below in alphanumeric ascending order i.e. drill holes prefixed with MDD precede MRCs which precede MRCDs and drill holes with 1 as the first digit (i.e. 1, 10, 100) precede these with 2 etc.

APPENDIX

2-1-2

APPENDIX 2 - 1 - 2

Assay Data

The assay data for all Moline Dam drill holes are listed in this Appendix. The order of listing is as for the drill hole collar summary.

Gold - both initial values and repeats - and, where available, arsenic, silver, copper, lead and zinc are listed. Available bismuth, cobalt and molybdenum analysis are listed in Appendix 2-2-3.

Four gold columns are shown on the assay sheets:

- Au 1 Original assay; value shown can be the average of two or more readings at the time of analysis.
- Au 2 Repeat assay using residue of pulp split originally assayed (as Au 1).
- Au 3 Repeat assay using different split off the 2-4 kg pulped residue returned from original assay laboratory.
- Au 4 Repeat assay using new split off RC cuttings from large plastic or calico sample bags.

Australian Laboratory Services Job # K836

(analysed sample not split from Australian Assay Laboratory pulverised residue)

APPENDIX

2-2-1

APPENDIX 2 - 2 - 1

Drill Hole Collar Summary Report

The drill holes for which assay data are presented in Appendix 2-1-2 are listed below in alphanumeric ascending order i.e. drill holes prefixed with MDD precede MRCs which precede MRCDs and drill holes with 1 as the first digit (i.e. 1, 10, 100) precede these with 2 etc.

APPENDIX

2-2-2

APPENDIX 2 - 2 - 2

Assay Data

The assay data for all North Hercules drill holes are listed in this Appendix. The order of listing is as for the drill hole collar summary.

Gold - both initial values and repeats - and, where available, arsenic, silver, copper, lead and zinc are listed. Available bismuth, cobalt and molybdenum analysis are listed in Appendix 2-2-3.

Four gold columns are shown on the assay sheets:

- | | |
|------|---|
| Au 1 | Original assay; value shown can be the average of two or more readings at the time of analysis. |
| Au 2 | Repeat assay using residue of pulp split originally assayed (as Au 1). |
| Au 3 | Repeat assay using different split off the 2-4 kg pulped residue returned from original assay laboratory. |
| Au 4 | Repeat assay using new split off RC cuttings from large plastic or calico sample bags. |
