

OTTER GOLD NL
ANNUAL REPORT EL 1271, EL 1276 AND EL 1277

APPENDIX 2
ENVIRONMENTAL MANAGEMENT
REGISTER

CR98/306

OTTER GOLD NL
TENEMENT ENVIRONMENTAL MANAGEMENT REGISTER
PRE-EXISTING ENVIRONMENTAL DISTURBANCE RECORD

<u>Tenement Names:</u>	Bluebush Hills	<u>No's:</u> EL	1271
	Tanami West	EL	1276
	Black Hills	EL	1277

Exploration Activity Area: CENTRAL DESERT JOINT VENTURE

Shafts/Pits/Dumps: Wild Turkey (historical – 1900's) shallow pits and shafts – small mullock dumps unfenced.

Track/Access: Track from Tanami mine to Apertawonga Ridge.
Track from Lajamanu road into Black Hills.
Access tracks established into current working areas.

Line Clearing: No mechanised line clearing / grid lines.

Costeaning: Old costean adjacent to road at Wild Turkey.

Drill Sites: Old CRA hole at Black Hills.
RC, DDH, RAB, and Posthole drilling programmes completed by the CDJV, 1989 – 1997.

Other: Old campsite at Black Hills (rehabilitate naturally)
Present campsite established on the SW boundary of EL 1276 and the NW boundary of EL 1271 (1989)

Location Data: See Figure 1.

<u>Compiled by:</u>	Barbara Cameron	<u>Date:</u> 31 March 1998

ENVIRONMENTAL IMPACT RECORD

<u>Tenement Name:</u>	Bluebush Hills	<u>No's:</u>	EL1271
<u>Report Ref No's:</u>	Annual Reports, 1990 -1997		
<u>Exploration Activities:</u>	DDH, RC, RAB and Posthole drilling.		
<u>Grid & Traverses:</u>	GPS gridded lines. Pegged lines.		
<u>Soil Sampling:</u>	None		
<u>Costeans/pits:</u>	None		
<u>Drilling:</u>	See attached list.		
<u>Drill Traverses:</u>	Along GPS lines (see attached).		
<u>Drill Pads:</u>	Cleared by hand.		
<u>Ground Geophysics:</u>	1 Gravity Traverse		
<u>Access Tracks:</u>	Some temporary access used.		
<u>Camps:</u>	Main Exploration camp on the SW corner of EL1276 and NW corner of EL1271 (established 1989).		
<u>Other:</u>			
<u>Compiled by:</u>	Barbara Cameron	<u>Date:</u>	31 March 1998.

Geochemical Sampling – EL1271

Apertawonga

Posthole Drilling: 14,755 (1,566 holes: Figures 1 and 2 of this volume)

Diamond Drilling: 83m (1 hole)

Wild Turkey

Posthole Drilling: 22,586m (1,705 holes: Figure 2)

Angled RAB: 16,598m (243 holes: Figure 2)

Reverse Circulation: 3,845m (38 holes: Figure 4)

Diamond Drilling: 553.16m (8 holes: Figure 4)

Calamari

Posthole Drilling: 6,985m (681 holes: Figure 1)

Angled RAB: 792m (13 holes: Figure 2)

Carthage

Reverse Circulation: 202m (3 holes: Figure 2)

Legend

Posthole Drilling 971m (61 holes: Figure 1)

Jericho

Posthole Drilling 2501m (265 holes: Figure 2)

Jims Find

Posthole Drilling 2793m (273 holes: Figure 2)

OTTER GOLD NL
TENEMENT ENVIRONMENTAL MANAGEMENT REGISTER
REHABILITATION RECORD

Tenement Name: Bluebush Hills **No(s):** EL 1271

Disturbance: Exploration **Rehabilitation Date:** 30/11/97

Grids & Traverses: All pegs to be removed at the end of licence tenure. GPS lines left to rehabilitate naturally.

Soil Sampling: None

Costeans/Pits: None

Drilling: All holes capped / backfilled.

Drill Traverses: Lines left to rehabilitate naturally.

Drill Pads/Access: Rubbish removed. Bags removed to sample farm. Sites left to rehabilitate naturally.

Ground Geophysics: None

Access Tracks: Main access tracks to be maintained. Disused tracks to be left to rehabilitate naturally.

Camps: To be rehabilitated at the end of licence tenure.

Other:

Inspected / Clearances: **Bond/Security released:**

Compiled by: Barbara Cameron **Date:** 31 March 1998

Follow-up Inspection Report: 30 November 1998

Geochemical Sampling – EL1276

Flores (Troy, Suva Pompeii)

Posthole Drilling: 17437m (1194 holes: Figures 1 and 2)

Angled RAB Drilling: 387m (9 holes: Figure 2)

Rockchipping: 5 rockchip samples

Guam

Posthole Drilling: 3095m (238 holes: Figure 1)

El Alamein & Leningrad

Posthole Drilling: 3,160m (290 holes: Figure 1)

Drilling – EL1277

Black Hills

Lag Samples : 930 samples

Posthole Drilling: 4,828m (1063 holes: Figure 1)

Black Dog

Posthole drilling 705m (64 holes: Figure 2)
