Dear Sir,

I did an extensive soil sampling for tin & some post hole sampling. I need to do more post hole sampling to see if the lease is viable. I would like your permission to do more post hole sampling for next year after the wet season phase. That was for MLN 656 on Bonnarie Str.

For MLN 655 I did not get there this year because of late wet this year & now early storms & also working on MLN 656, but we will endeavour to get there next year.

Yours faithfully
J.R. Pott
