

**OLYMPIA RESOURCES NL  
RELINQUISHMENT REPORT  
1999/2000  
EL9558**

**CR 2001 - 0069**

**EL9558, covering 52 graticular blocks, was granted to John William Benger on December 4 1996 for six years. Olympia Resources NL acquired an option to purchase EL9558 dated May 1999, which expires on 30 June 2000.**

**The option was exercised during 2000, and the tenement is now registered in the name of Olympia Resources NL.**

**EL 9558 is being explored for Industrial Garnet resources. The main area of interest within the EL is within the river creek systems which contain Almandine Garnet derived from the weathering of the Irindina Gneiss.**

**No work was carried out in the relinquished area in 1999-2000 and therefore this section of the EL being 13 blocks, was relinquished.**
