

EXPLANATION OF DATA FILES

The following information is a description of the file names and conventions used to describe the digital data. All data is in AGD66, TMAMG53 coordinate system.

FILE TYPES

*.pdf	Adobe Acrobat
*.txt	Ascii (tab delimited for tables)
*.las	Ascii down hole data
*.jpg	Photos
*.ers and *. *.dat, *.dfn and *.des	ERMapper grid
*.dsp	ASEG GDF ascii
	Raw PIMA SWIR reflectance spectral file (TSG-ASCII)

NAMING CONVENTION

The data directory has the following file and directory naming convention.

\Geophysics

All the geophysics data is in AGD84, TMAMG 53 coordinate system.

2858	Goomadeer EL 2858
Amag	Airborne Magnetics
Arad	Airborne Radiometrics (TC, K, U, Th)
Arad256	Raw channel airborne radiometrics
Dtm	Digital Terrain Model
