ANNUAL EXPLORATION REPORT

INTRODUCTION

Exploration Licences No's 7908, 8526, 9833 and 9845 was previously subject to the former South Tanami Joint Venture (STJV) and exploration was conducted by Newmont Tanami Pty Ltd on behalf of the holder of the Licences.

PROGRAMME DESCRIPTION

During the course of the last 12 months, the respective parties to the STJV have assessed exploration conducted to date under the terms of the joint venture and the ongoing participation in this project. As a result, Newmont Tanami Pty Ltd has withdrawn from the joint venture arrangements and Placer Dome Asia Pacific is currently operator of activities being conducted on this Exploration Licence.

Notwithstanding the level field activities have been conducted within Exploration Licences No's 7908, 8526, 9833 and 9845 during the past twelve months, considerable time has been spent bringing the former joint venture to an end, which in turn has required ongoing compilation and assessment of data to enable the operator to formulate a strategy for the further exploration or divestment of its interests in the Exploration Licence.

EXPENDITURE

Total expenditure for this Licence for the twelve month period is to be determined when all information is obtained from the former operator and will in due course be lodged with the Department of Business, Industry and Resource Development.

PROPOSED PROGRAMME (for the next twelve month period):

As noted previously in the Annual Report, Placer Dome Asia Pacific Limited is currently evaluating and reassessing exploration previously conducted on this Exploration Licence and depending upon the results of the work, the company will either resume an active exploration programme, divest its interests by way of joint venture participation or surrender the Exploration Licence.

PROPOSED EXPENDITURE

Claimable exploration costs associated with, and depending upon, the proposed programme as outlined above.
