Section 7. Comments on your exploration activities:

During the course of the last 12 months, the respective parties to the STJV have assessed exploration conducted to date under the terms of the joint venture and the ongoing participation in this project. As a result, Newmont Tanami Pty Ltd has withdrawn from the joint venture arrangements and Placer Dome Asia Pacific is currently operator of activities being conducted on this Exploration Licence.

Notwithstanding the level field activities have been conducted within Exploration Licence No 7997 during the past twelve months, considerable time has been spent bringing the former joint venture to an end, which in turn has required ongoing compilation and assessment of data to enable the operator to formulate a strategy for the further exploration or divestment of its interests in the Exploration Licence.

I certify that the information contained herein, is a true statement of the operations carried out and the monies expended on the above mentioned tenement during the period specified as required under the *Northern Territory Mining Act* and the Regulations thereunder.
