

**EL 22786**  
**Program for 2006 year (year 3)**

The program for 2006 (year 3) will comprise:

1. Field mapping and out crop sampling
2. Analysis of samples
3. Possible remote sensing data acquisition

The aim of the exploration program will be to determine if manganese mineralisation exists in the tenement area

Total expenditure for the year on exploration and resource definition activities is anticipated to be \$15,000.
