

EXPLANATION OF DATA FILES

The following information is a description of the file names and conventions used to describe the digital data. All data is in AGD66, TMAMG53 coordinate system unless otherwise specified.

FILE TYPES

*.pdf	Adobe Acrobat
*.txt	Ascii (tab delimited for tables)
*.las	Ascii down hole data
*.jpg	Photos
*.ers	ERMapper grid header file
*.hdr	ENVI grid header file
*.	ERMapper or ENVI grid data
*.dat and *.dfn	ASEG GDF located ascii
*.fos	Raw PIMA SWIR reflectance spectral file
*.zip	Winzip compression file
*.xls	Excel file

NAMING CONVENTION

The data directory has the following file and directory naming convention.

\Geology

KL_Outcrop* Outcrop geology observations.

\Geochemistry

Files of geochemistry results.

KL_Geochemistry* Outcrop geochemistry.

\Pima

KL01C1a0001 Pima data for outcrop sample

\Geophysics

kl_nogo_atem	Kukalak project TEMPEST data with NOGO zones excised in accordance with request from Traditional Owners.
final	Final data
uncorx	Uncorrected raw and CDI data for x component
uncorz	Uncorrected raw and CDI data for z component
tau	Adaptive time constant
xch	X channel
zch	Z channel

\Hyperspectral

cc3801mk	Hyperspectral (Hymap Mk1) data (where 3801 refers to the flight number)
