

Eromanga Uranium Limited

Proposed Program and Expenditure for 2008

Abminga Project

EL 25166 – Jenkins Bluff

Rotary mud and/or RC drilling	\$35 000
Downhole geophysical logging	\$ 5 000
TOTAL	\$40 000

Drilling will be undertaken to effect first pass evaluation of potential buried palaeochannels within the Eromanga Basin which may host sedimentary uranium. The drilling will investigate various features highlighted in the 2007 regional airborne EM surveys. Downhole geophysical logging of all drillholes will be undertaken.
