

Gamma Ray

BH

MURB012

The figure displays three depth-based plots, each with a vertical axis representing depth in meters (0 to 20+). The plots are labeled GRO, GRT0, and GREO.

- GRO (OBSC):** The y-axis is labeled "Depth measured 1:200". The x-axis is labeled "OBSC" with values 0 and 500. A red line shows the data profile.
- GRT0 (true counts):** The y-axis is labeled "SPED" with values 0 and 10. The x-axis is labeled "true counts" with values 0 and 5000. A blue line shows the data profile.
- GREO (%U3O8):** The y-axis is labeled "TENS". The x-axis is labeled "%U3O8" with values 0 and 0.05. A red line shows the data profile.

Each plot has a grid with major lines every 2 units on the y-axis and major lines every 100 units on the x-axis. The data profiles are plotted against the y-axis, with the x-axis values indicated by the grid lines.
