FINAL REPORT E.L. 26544

Geologist Warwick Rafferty of NuPower Resources Ltd and myself, visited the area on 15.11.08. Mr Rafferty picked me up at Darwin Airport upon arriving from Brisbane then travelled by Nissan 4x4 to area by the Litchfield Wangi Road.

I had a scintillation counter Model B.G.S. IS and G.P.S. Mr Rafferty had a smaller counter and something like a thermo scientific unit that indicates elements like Al, Si and Mg levels.

The area mainly granites outcrop and some is altered as in Appendix 'A' with pegmatites intrusions 1mm-20mm thick. There are minute placers that show up on scintillator around 800 parts. So you would think it is not coming out of granites. Samples were taken of this material @ S.12'-57.17.6 E130-41.05.3 assay of this material Appendix "B" as there is no economic minerals on the E.L. I wish to cancel this said E.L.

A handwritten signature in black ink, appearing to read "J. B. Walter", with a stylized flourish at the end.
