SUMMARY

EL26992 ("Roper Bar South") is located about 205km ESE of Mataranka in the Gulf Country of the Northern Territory.

EL26992 was granted to WDR Iron Ore Pty Ltd (a wholly owned subsidiary of Western Desert Resources Ltd) on 24th April 2009. Western Desert Resources is targeting the Sherwin Ironstone Member of the Mesoproterozoic Roper Bar Group for iron ore mineralisation. The Sherwin Ironstone Member is interpreted to be absent in the relinquished portion of the tenement, which is the reason for relinquishment of this area.

An Authority Certificate was obtained from the Aboriginal Areas Protection Authority which did not identify any Restricted Work Areas within the tenement. However, no geological work has been carried out on the relinquished parts of the exploration licence.
