The above lease has been held by Colfred Pty Ltd for the past ten years, during which time no mining has taken place. This is because of lack of a market for the produce.

I have periodically visited the lease for inspection purposes to ensure the transportable accommodation located at the site was in situ and that no vandalism had taken place. Everything has always been found in order.

I had planned to close down the site eighteen months ago, but ill health delayed plans. However, in the past few months I have commenced the closing process, that is the restoration of the site, and hope to have it completed before the end of this financial year.

I trust this gives you adequate information. Please contact me if you need further details.
