DISCLAIMER STATEMENT
This document and the geoscience data presented herein have been provided by qualified and competent geologists and geophysicists using industry accepted principles and scientifically accepted methods and techniques. International Geoscience Pty Ltd does not (and cannot) guarantee or warrant the accuracy of the results as interpretation products are always subject to limitations of the data and information used in creating them. The conclusions and recommendations presented in this document are the results of a comprehensive study and analysis of the available data and theory at the time of this documents creation.

This document and its content are the copyright of Universal Splendour Investments. The document has been written by International Geoscience for submission to the Northern Territory Department of Mines and Energy as part of the tenement reporting requirements as per the Mineral Titles Act (NT). Any information included in the report that originates from historical reports or other sources is listed in the “References” section at the end of the document. All relevant authorisations and consents have been obtained. Universal Splendour Investments authorise the department to copy and distribute the report and associated data.
EXECUTIVE SUMMARY

USI NT (USI) hold exploration license EL 29322; one of six ELs collectively referred to as the Amadeus project area. In August 2014 EL 29322 was completely relinquished.

The tenement was never visited due to very poor access.

1 OVERVIEW

USI NT (USI) hold exploration license EL 29322; one of six ELs collectively referred to as the Amadeus project area. In August 2014 EL 29322 was completely relinquished (Figure 1).

The tenement was never visited due to very poor access, therefore the tenement has been completely relinquished.

Figure 1: Location of the USI’s Amadeus project and the outline EL 29322 in blue.

EL 29322 (51 blocks) was granted to USI on the 02/10/2012 for a period of six (6) years.

In August 2014 EL 29322 was completely relinquished.
2 EXPLORATION ACTIVITY OF REPORTING PERIOD

2.1 Field work
EL 29322 was never visited due to poor access.

Figure 2: Location of EL29322.
3 RECOMMENDATIONS
The following recommendations are suggested in order to evaluate the mineral prospectivity of the surrendered blocks:

- Full review of possible mineralisation styles expected in the area.
- Possible geophysical survey to facilitate exploration.
- Full background study of historical exploration in the region
- Reconnaissance field investigation of any outcropping areas
