Executive Summary

During the reporting period 28 February 2011 until 27 February 2012 there were no exploration activities undertaken by Quasar Resources Pty Ltd (QSR) within EL 26194.
**Proponent Details**

The operator for the exploration licence is Quasar Resources Pty Ltd.

**Address**

Level 4  
25 Grenfell Street  
ADELAIDE SA 5000  
Phone: 08 8110 0531  
Fax: 08 8212 5559  
Email: joy.barnes@quasarresources.com.au

**Contact Person**

Joy Barnes – Executive Assistant/Tenement Manager
1. Location and Access

EL 26194 Umbeara is situated on the Kulgera SG5305 and Finke SG5306, 1:250,000 map sheets of Northern Territory. (Figure 1) The tenement covers approximately 234 blocks totalling 724 km² and is located northeast of Kulgera Roadhouse. Both the Stuart Highway and the Adelaide to Darwin Railway intersect the tenement (Figures 1).

Access within the tenement is on gravel roads and pastoral station tracks.

2. Tenement Details

QSR holds 100% interest in EL 26194, which was granted on the 28 February 2008. The land tenure of the licence is Perpetual Pastoral Lease (Table 1).

3. Geology

Quasar is primarily targeting the uranium potential of the Mesozoic and Cainozoic sedimentary cover sequence where Eromanga Basin sediments onlap the southeastern margin of the Amadeus Basin and the Musgrave Block. It is also prospective for IOCG mineralisation in Mesoproterozoic basement rocks.

The focus of uranium interests are the Mesozoic and Cainozoic sedimentary succession which are bounded by the Musgrave Block, with potential metamorphic and igneous uranium enriched source rocks. These basement rocks are dominated by felsic gneisses with protolith ages of 1590-1540Ma, which are intruded by a suite of granites (Pitjantjatjara Supersuite/formerly Kulgera Suite) dated 1190-1120 Ma (Edgoose et al., 2004).

There is also additional potential for calcrete-hosted uranium mineralisation within surficial Cenozoic sediments which are characterised by ephemeral valleys and small playa lakes.
