A small team was sent to the area in June 2012 but due to the rough terrain encountered and lack of tracks they were unable to complete traverses.

Linna Huang has made an offer to purchase ML 25205 and will obtain EL 28125 as part of that purchase.

Linna believes that a different approach is needed and in 2013/2014 we will charter a helicopter to access difficult areas during the 2013/14 reporting period. This will speed up the exploration program.

As a result, we apply for a waiver of reduction of blocks for this EL.

Signed .......................................................

Gerald Pauley, Project Manager.
