CBM 93-01: RECORD OF Cannester Numbers versus Depth. To be included in Appendix #5 and #6 in the well completion report.

Notes: Central Sample Numbers correlate with Q1 data sheets compiled the field. GeoGas added suffix, Central Sample#1 became CBM001-01, and to confuse further added their own number, PER0012, a number contiguous with the 11 samples analysed from Blamore – 1. CORE RETURNED FROM GEOGAS, ½ core slabs and presumably full core where not analysed, DO NOT HAVE CORRECT DEPTH REFERENCE, only Cannester numbers. This table needs to be referenced to establish correct depth of core samples held by Central Petroleum Limited.
