September 2014
Abstract:
EL 25749 is the only currently granted exploration licence in the Peterman Ranges area of the Northern Territory and covers an area of 600km² (figure 1). The area is considered to be prospective for base and precious metals. Work conducted in the second year consisted of a comprehensive literature survey and desktop research, as no access authority was obtained from the Central Land Council (CLC). Late in the second year of tenure access was negotiated with the CLC and it is planned to conduct field exploration activities in the third year of tenure - 2014/15.

LIST OF FIGURES

Figure 1 Location Map
1. LOCATION

EL 25749 is located some 500km to the west southwest of Alice Springs in the Northern Territory adjacent to the Northern Territory – Western Australia border. The licence has a regular shape having a north-south length of 30km with a maximum east-west width of 20km and lies between 25° 10’S to 25° 26’S and 129°E to 129° 12’E. The licence is located upon freehold land owned by the Petermann Aboriginal Land Trust.
2. **TITLE HISTORY**

Mineral Tenure:
EL 25749 was applied for by Clearview Estate Nominees Pty Ltd on 02/01/2007 and granted in accordance with the *Aboriginal Land Rights Act (NT)* and the *Mining Act* on 24/07/2011. This is the Second Annual Technical Report which covers activities in the period 24/07/2013 to 23/07/2014. The licence has an area of 192 graticular blocks (596.2 km²). At the end of the second year of tenure a waiver of reduction was applied for and granted by the Department of Mines and Energy.

3. **GEOLOGICAL ACTIVITIES**

**2013/14 Work Done**

Office:
Office based exploration activities consisted of a comprehensive literature survey and general research into the area for future use in on-ground exploration.

Field:
Clearview have not had the opportunity to access to the ground since grant. Agreement with the Traditional Owners was reached in the second year of tenure, and an Entry Permit was granted on 18 July 2014. Accordingly, there were no field activities conducted during the year.

**2014/15 Proposed Activities**

Proposed Geophysical Gravity Survey:
The company will be participating in the NT Geological Survey’s (NTGS) proposed West Amadeus Gravity Survey.

The survey is planned to commence in July 2014 and all land clearances etc will be undertaken by the NTGS in co-operation with CLC. The survey will be helicopter supported and will require ground based Bouguer gravity readings on a 4km spaced grid. Participating explorers have been offered partnerships to infill the proposed survey at spacings of 2x2 or 1x1 km for areas 500 square km or greater. Closer infill spacings will be selected during the survey.
Proposed Field Work:

The 2014/15 field program as submitted to the CLC will involve the following:

- Ian Hart will be the sole participant for the reconnaissance program, however, there might be an opportunity to seek assistance from a local traditional owner to act as a guide. Ian intends to set up a fly camp just inside the EL’s northern boundary.
- The reconnaissance program will take between two and three weeks.
- Basic reconnaissance to look at geology – there are no records of this area being explored for minerals in the past.
- Use existing tracks/roads and seek advice from Traditional Owners and other elders in the local country. Any off road would be on quad-bike or on foot.
- Rock and soil samples may be taken but only using “hand tools”.
- Geological mapping – this will be undertaken using existing tracks/roads and any off-road by quad-bike or on foot.
- Accommodation will be via fly camp - trailer housing quad-bike and trailer-top accommodation.
- It is proposed to cover the whole licence area in this initial reconnaissance exercise.
