ABSTRACT

EL25749 is located in the Northern Territory on the border with Western Australia, approximately 45 kilometres south of Docker River.

Previous geological information on this tenement cannot be found owing to the fact that this is the first EL to be granted on this area.

The Tenement was granted to Clearview Estate Nominees on 24 July 2013 and comprises 192 blocks.

No work was done on the Tenement in the last reporting year due to an accident suffered by our Geologist in the early part of this year.

In the following 3 months we hope to initiate a basic soil sampling program with grid spacing is yet to be determined.

Initial results from minor Auger drilling by hand in prospective areas will determine the following phase of exploration; however many will include some geophysical surveys, including magnetic survey. The geophysical survey is likely to be completed in the early part of 2014.
