MCN 5097 was first applied for by Corporate Developments Pty Ltd on 6th August, 1996 and was not granted till on 23rd August, 2007 for a period of 10 years. MCN 5097 covers an area of 8 hectares.

MCN 5097 was original applied for to be part of a group comprising the Bynoe tantalite project which is held by Softwood Plantations/Corporate Developments Pty Ltd (now Australia New Zealand Resources Corporation Pty Ltd ('ANZ Res')).

In 2001, Julia Corporation Ltd farmed into the current project areas held under MCN or MLN title by Corporate Developments/Softwood Plantations (including this one) expending \$556,752.00 before withdrawing in 2002.

Applications have been made over time to the Department of Lands to freehold Term Crown Leases at Leviathin Creek owned by Corporate Developments (now 'ANZ Res') to enable the establishment of a process plant to treat the ore from various deposits, but no approval has been received.

Since then there has been minimal work on this tenement.
