## **SUMMARY**

After consultation with the Titles Division of the Department of Business, Industry & Resource Development in March 2004 it has been determined that this report represents an extended overall Annual Report to cover the years from 01/01/2001 for MLN1109 and from 01/01/1999 for MLN 833 up until 31/12/2003 in each case. The Union Reefs Gold Mine workings and treatment facilities are located upon these mining tenements.

It is noteworthy that for a long period the spatial position of MLN833 is in the central portion of the western wall of the Crosscourse Pit. As such, it has not been feasible to prepare a separate mining or exploration report and it is not specifically referred to in the following document for the same reason.

The Appendix 1 document entitled *MINE CLOSURE REPORT Union Reefs Gold Mine (Pine Creek)* has been previously lodged with the Mines Division at DBIRD on 09/11/03 and represents a detailed review of the operations throughout the ownership of AngloGold Australia Limited.

The primary aim of this report was to compile a single condensed summary that wholly encompasses all works carried out to date pertaining to this operation. This document is factual figures with some annotation / interpretation offered on certain aspects particularly with relation to changes in Block models, Pit Designs and the like.

### **Tenure**

<b>Tenement</b>	<b>Granted</b>	<b>Region</b>	<b>Annual Exploration Report Due</b>
MLN 1109	16-Dec-93	Union Reefs Mine	31-Mar-04
MLN 833	6-Mar-78	Union Reefs Mine	31-Mar-04

### **Proposed Exploration Expenditure**

It is not planned that any further exploration expenditure by AngloGold will occur on MLN1109 or MLN833 in the period following the date of the announced closure. An agreement for the sale of the Union Reefs Mine to Greater Pacific Gold Ltd was announced on 14 November 2003 and it is expected that any further exploration expenditure will be incurred by Greater Pacific Gold Ltd after handover.
