

Anomaly axes (purple) with lineament interpretation (black) on automatic gain control image of first vertical derivative of TMI

contour interval 2nT

Projection:  
UTM AGD66  
zone 52

Grid North 0

Enclosure 3

Suplejack Pty Ltd

Axes of shallow-source magnetic anomalies interpreted from the RTP image.  
Sources may be a combination of distributary channels with detrital  
magnetic, or magnetization in bedrock fractures.

Scale 1 : 20000
