MANAGEMENT

## MCN 933

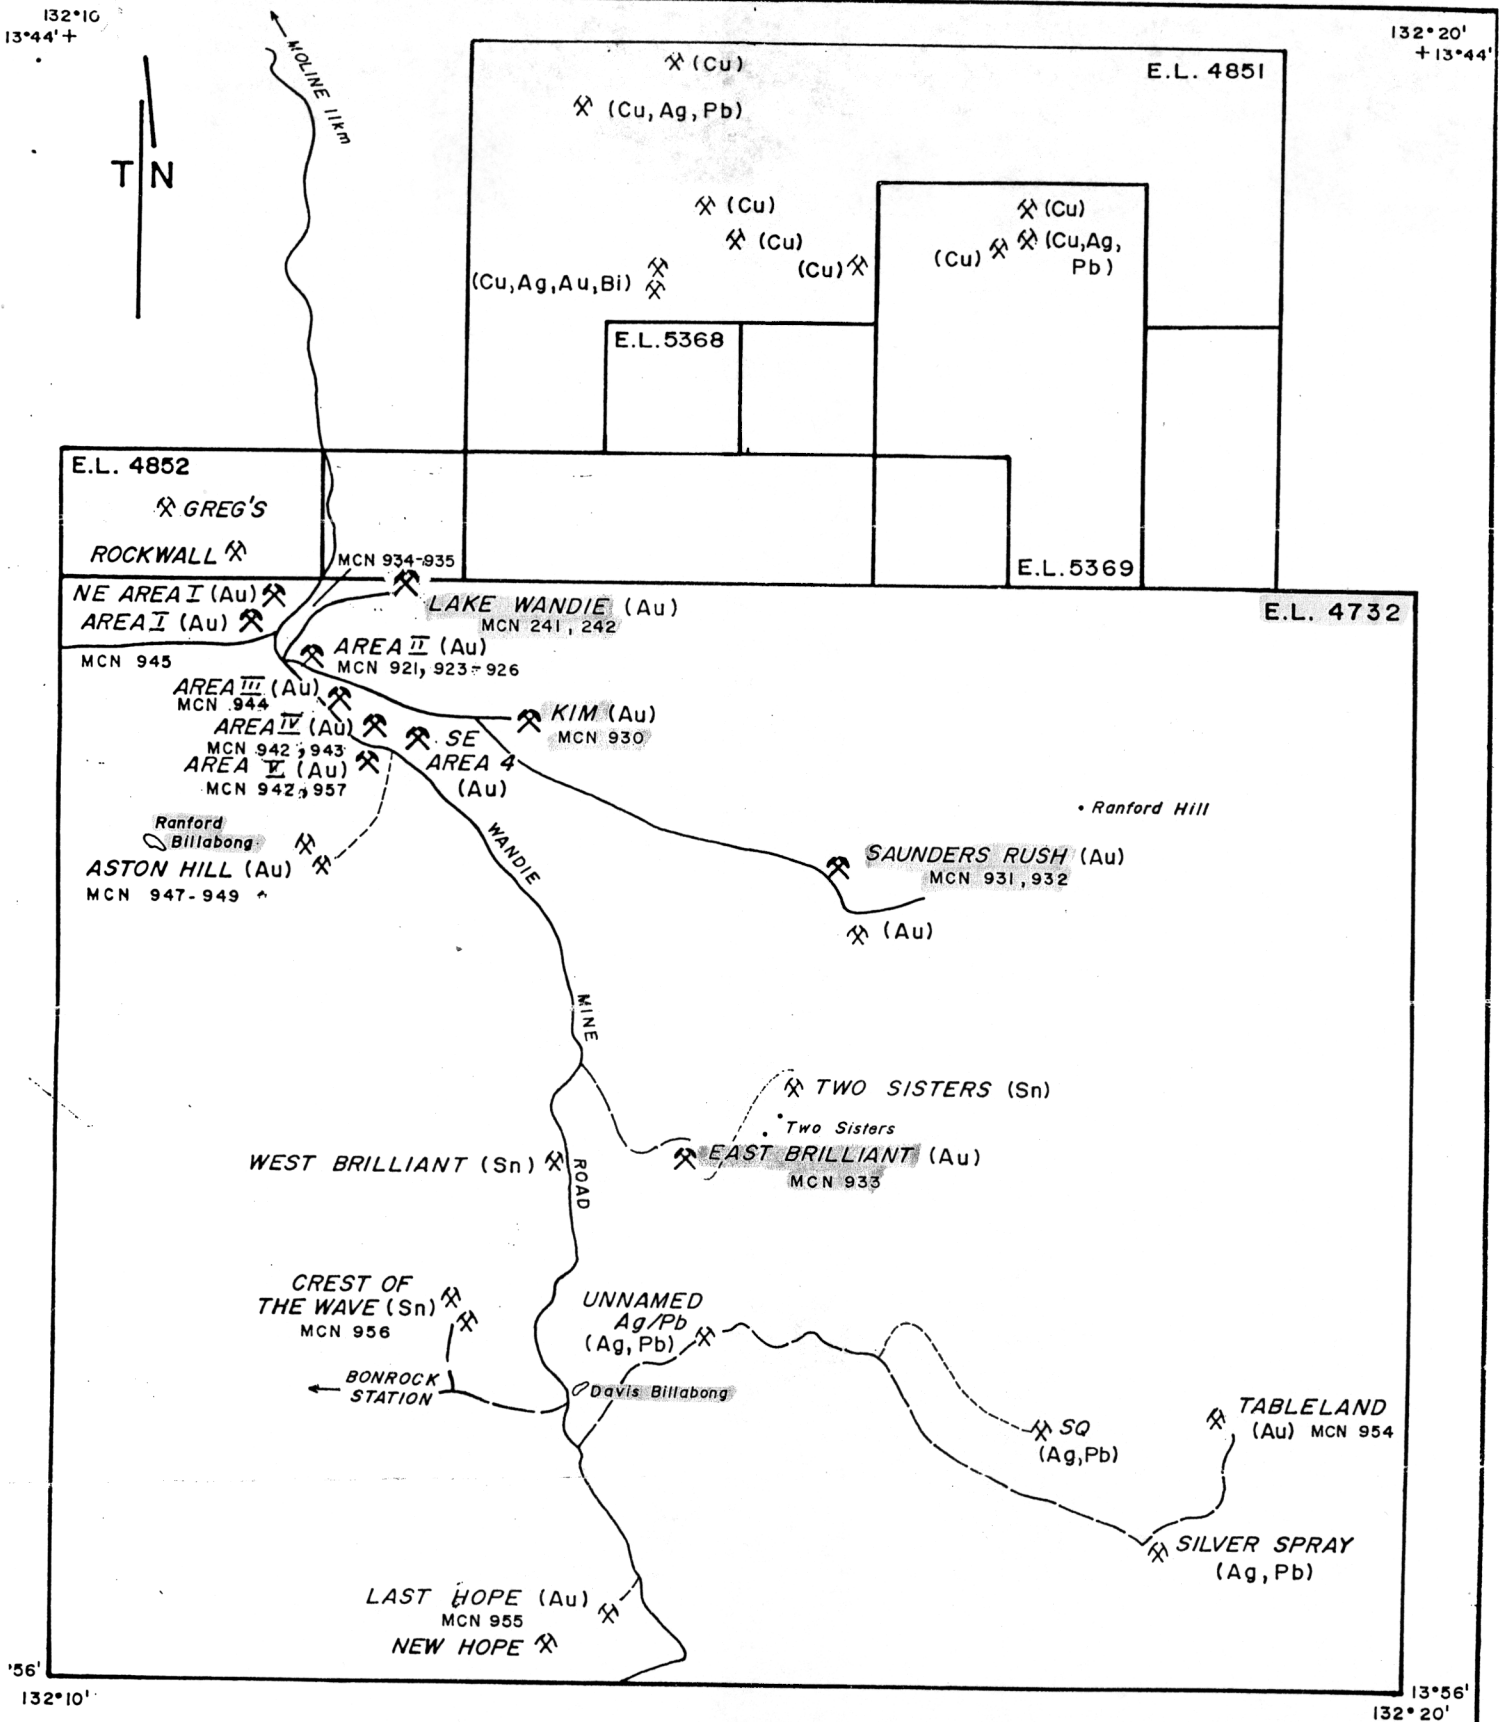

MCN933 was renewed on March 26, 2001 for a period of ten years.

The lease was only visited a few times over the past year, as the road is impassable for at least 8 months of the year.

The area was worked with a metal detector and some pick and shovel prospecting. Samples were brought back to Pine Creek and panned off, and a couple of small nuggets were found.

Disturbance to the area was negligible and no rehabilitation is necessary.

No major works are planned for the next twelve months. The lease will be worked with a metal detector through the next dry season.

- Gravel road
- - - Bulldozed vehicle track
- - - Bush track
- ⌘ Large area of workings
- ⌘ Workings
