EXPLANATION OF DATA FILES

The following information is a description of the file names and conventions used to describe the digital data. All data is in AGD66, TMAMG53 coordinate system unless otherwise specified.

POSSIBLE FILE TYPES

*.pdf	Adobe Acrobat
*.txt	Ascii (tab delimited for tables)
*.las	Ascii down hole data
*.jpg	Images
*.png	Images
*.ers	ERMapper grid header file
*.hdr	ENVI grid header file
*.	ERMapper or ENVI grid data
*.dat and *.dfn	ASEG GDF located ascii
*.fos	Raw PIMA SWIR reflectance spectral file
*.zip	Winzip compression file
*.xls	Microsoft EXC

NAMING CONVENTION

The data directory has the following file and directory naming convention.

\Drilling

GD02_RAB *	Rab geochemistry, rock types and locations.

\Geophysics

tcca	Tin Camp Ck - Caramal
tcag	Tin Camp Ck - Algodo
tcmj	Tin Camp Ck - Mordijimuk
tcz25	Tin Camp Ck – South of South Horn (Z25 Anomaly)
nogo	Cultural sensitive nogo zones removed from data
atem _x	TEMPEST raw data: x component
atem _z	TEMPEST raw data: z component
atem_time_constant	TEMPEST time constant
xzcdi	TEMPEST cdi data and raw data
CDSECT	TEMPEST Fugro stacked sections
