1.0 INTRODUCTION

1.1 OPERATOR DETAILS

Holcim Australia Pty Limited (Holcim) has developed this Annual Report in order to satisfy the annual reporting requirements of S.94 (1) and (2)(a) of the Mineral Titles Act 2010.

Holcim holds Titles MLNs 387, 388, 389, 392, 393, 394, 396 & 397 for the Noonamah Quarry (Elizabeth Valley).

This Annual Report has been prepared based on information sourced from Mr Alan Stevens, Operations Manager, Concrete and Quarries, Darwin.

1.2 LOCATION

The Titles are located at Noonamah, approximately 40km south east of Darwin City via the Stuart Highway. Access to the tenements can be gained by turning left off the Stuart Highway at Noonamah onto Elizabeth Valley Road, then travelling east for approximately 18km along Elizabeth Valley Road to Redcliffe Road.

The site of the quarry covers a combined area of approximately 127 hectares (ha).

1.3 LEASE DETAILS

2.0 HISTORY, CURRENT STATUS & FUTURE ACTIVITIES

In 2001, Holcim, then CSR Readymix, prepared a Notice Of Intent with intentions of extracting the hard rock. Shortly after, local residents and environmental groups worked to reduce mining activities in the area. The load rating on the local roads was reduced to 10t, which eliminated any heavy traffic out of the quarry.

As a result, extraction and haulage of the material was made difficult and there has been little to no activity on the site. Holcim plans to conduct assessments in the future with intentions of finding a solution to the haulage issue.
