To whom it may concern,

RE: Submission of requested missing digital drill data (GeoPeko & Cuprex Data) for MLC 18.

DPIFM has requested missing digital drill data (GeoPeko & Cuprex Data) for MLC 18. After extensive and exhaustive searches of both Emmerson Resources Databases and Libraries the requested data was sourced in part only, and the parts sourced accompanies this document, in the prescribed format (.txt files). The remaining digital data for aforementioned drilling can only be presented in Datamine format, as Emmerson Resources doesn't possess the required software to enable the data to be transferred into the required format for submission. Emmerson Resources is currently undertaking a review of the centralized data management system with the aim of constructing a data management system to allow the maintenance of all project data with seamless integration between the data repository and various exploration applications used by Emmerson. Following the implementation of a suitable proposal Emmerson Resources may then be able to provide the required digital data in the required format.

For any further questions in relation to this matter please don't hesitate to contact me anytime on the below details,

Regards
