ABSTRACT

This EL is a narrow (average 150m wide) sliver of land created as a result of the Datum shift from AGD84 to GDA94 and which was excluded from the surrounding SEL 26452. Exploration expenditure has been apportioned from SEL 26452. This licence was surrendered on 6 May 2010 as the area falls wholly within Mineral Lease 27244 which covers the Wonarah deposit.

1. SUMMARY

This EL is a narrow (average 150m wide) sliver of land created as a result of the Datum shift from AGD84 to GDA94 and which was excluded from the surrounding SEL 26452. Exploration expenditure has been apportioned from SEL 26452. This licence was surrendered on 6 May 2010 as the area falls wholly within Mineral Lease 27244 which covers the Wonarah deposit.

Although one line of 51 RC holes and 2 diamond-cored holes were drilled on EL26583 the results and interpretation have been reported in the combined report for the Wonarah Phosphate Project submitted to the department in February 2010 as they would make no sense if reported in isolation and out of context.

Notwithstanding this, all data acquired pertaining to EL26583 is again submitted in digital format for this final report.
