Dear Sir/Madam,

I have to report as per Section 93(1)(a) of the Act, activities conducted on 22/21/49 during this past twelve months.

I would very much like to relate to a report dated 23 May 2009 as a similar year has passed to that reported previously.

I approached Bushfire Council in 2010 as to burn the said site whilst conducting control burning of Tararak Station. Unfortunately this was unable to occur due to reasons of their unit commanders. They had been in favour of my initial request.

This 2010 caravan season was very much down on previous years as you are aware this so called dry season was affected by rain during all months of 2010.

As previously stated I am a pensioner, returned service man with limited funds available.
I do intend to approach a number of people shortly to inform them of my interest in the site at 22149. There are such people in Darwin.

There has not been any disturbance to this rocky outcrop by myself. All material is loose, left over from Chinese diggers around 1800 as I previously have reported to you.

It remains to be seen when access into the site will eventually as it has been a very wet season.

I will again approach Bush Fire Council as to a controlled burn of the area.

I do hope you accept my letter to your Department.

Yours faithfully,

[Signature]

Raymond F. Doran
