BOUGUER GRAVITY MAP

CONTOUR INTERVAL 1 mg

J.E. Burdary  
Minerals Administration Pty Ltd  
November 1960

Scale 1:50,000

NORTHERN TERRITORY  
GEOLOGICAL SURVEY

Bouguer gravity values based on the observed gravity value of 978.65360 gals at B.M.R. pendulum station, Alice Springs, N.T. and estimated accurate to 0.35 milligals.  
Elevations determined by micro-altimeters from bench marks on railway, estimated accurate to 5 feet and relative to M.S.L. Port Augusta.  
Station positions determined on 1:50,000 air-photos and plotted onto Dept of Interior mosaics.  
Elevation correction factor 0.06471 milligals/foot
