ANNUAL REPORT
MCN 303

YEAR: 2012/13

Current/Past activities:

All exploration work on MCN 303 is now completed. A resource of 40 000 tonne grading 0.3 g.p.t Au has been proven on-site. No hard rock mineralization is present on this area. All alluvials are derived from gold bearing structures 500m to the east.

Planned future activities:

The alluvials will be mined on completion of the Yam Cree, Red Hill Alluvial operation.
