The rest of the information has been sourced from open reports and data through the Department of Mines and Energy. The Minister has authority to publish the copyrighted information accordingly.”

2 Summary

MCC205-208 and MCC983-990 lapsed on 10/12/2015 upon grant of ML30676 which covers the same area (collectively, the Alexandria Gypsum Project).

ML30676 is prospective for gypsum.

3 Location

The Alexandria Gypsum Project is located approximately 260 km east north-east of Tennant Creek on Alexandria Station, NT Portion 0001 Perpetual Pastoral Lease 913. The project cover an area of some 228 hectares. The station homestead is situated approximately 8 kilometres east north-east of the project.

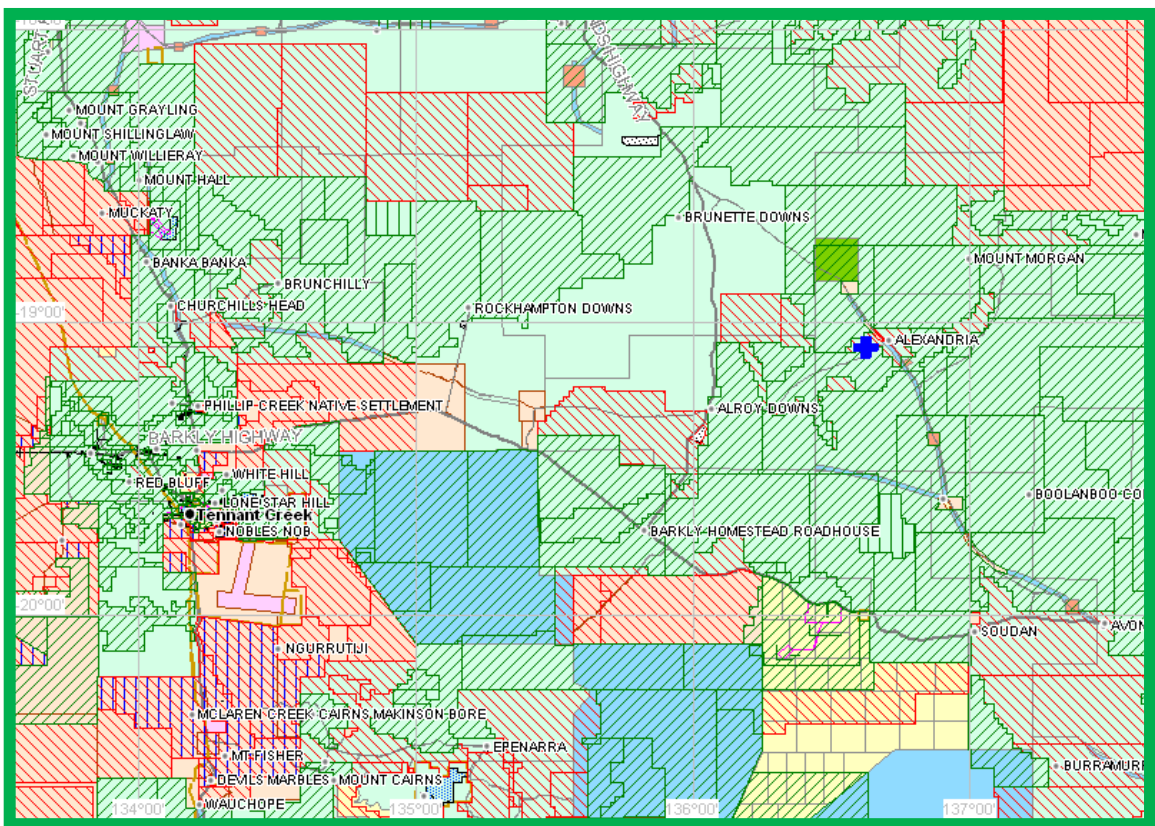

Figure 1: Location Map

Please refer Appendix 1 for tenement map.

4 Exploration Rationale

No exploration was carried out on these claims for the year. The tenements were granted for the purpose of mining Gypsum

4.1 Results for the Reporting Period

No samples were collected or drilling undertaken during the reporting periods.

4.2 Quantified Gypsum reserves/resources

Auger drilling program in 1990 estimated by LG Nixon and associates at 1.0 Million tonnes

4.3 2014 Program Reconnaissance & Preparation

No exploration is planned for the upcoming season.

5 Expenditure
