Report Details: **NATA ACCREDITATION No: 14610**
Test results only apply to samples received
Samples were analysed between 06/01/16 and 22/01/16
Water samples will be discarded one month from date of report

Comments:

Due to high levels of dissolved solids some samples have been diluted to reduce matrix effects.

The dilution factors are listed in the report & the detection levels are raised accordingly.

Samples with concentrations greater than the linear working range (>LWR) of the ICPMS were reanalysed by ICPOES.

These samples were incorrectly preserved for Mercury analysis. Mercury data is indicative only.

Authorisation:

Andrew McKeon
