

# Technical Reporting

**Tenure:** EL32918

**Group Report ID:** NA

**Title:** Partial Relinquishment report

**Report Period:** 30 August 2022 - 30 August 2024

**Title Holder/Operator:** Anthony Wright

**Personal Author:** Anthony Wright

**Report Type:** Partial

**250K Mapsheet/s:** Huckitta, SF5311

**100K Mapsheet/s:** Jervois Range, 6152

**Geological Province:** Aileron Province

**Target Commodity:** Copper/Lead/Gold

**Purpose for which Titles are held:** Exploration for the above

**Title History:** EL32918 was granted on 30 August 2022. Dropped 18 blocks at the end of year 2.

**Work Done:** The lease is a very long way from Darwin - roughly 1770km - see location and access plan attached. It is near the NT/OLD border so field trips require a lot of preparation and I have to take everything (fuel, water, food) in with me so I can stay for a couple of weeks at a time. The area is a hot-spot for minerals (3km next door to the Jervois Copper mine mineral field) and drilling there has intersected Cu and Au but very deep so will be expensive to drill. I want to get a quote to put a track on off an access road at the top of the lease and to get Skymax in to fly a drone survey. I will also talk to Jervois re a JV or sale. Mineral Titles asked me to drop 50% of the titles after year 2 which I have done.

**Results:** The blocks dropped are less prospective.

**Conclusions:** The blocks dropped are less prospective.
